Filing of PCT International Applications
Filings by Country of Origin
December 2007

Explanations and Definitions:

PCT applications are counted in the year/month in which they are filed with a PCT receiving Office.
Country of Origin is the residence indicated for the first named applicant.
Codes "--" or "**" or blank are used when origin is unknown or unavailable.
The last four months are provisional and incomplete data.

Notes for updating:
Since data is incomplete for the last few months, we need to manually choose the "end month" to report.
A new column has to be manually added to the formatted table above.
And the chart has to be updated to include the new end month.

Record Copy Trends

Explanations and Definitions:

The graph shows the number of record copies received at the International Bureau each month. The central trand line is a moving average which shows the overal trend after removing seasonal variations.

Record Copy Processing Times:

Because record copies are only received at the International Bureau after processing at a receiving Office, the figures for each month are strongly influenced by processing times at the receiving Offices. For this reason, trends in the receipt of record copies are not always reliable indicators of demand for PCT.

PCT Record Copies received at the International Bureau
December 2007

Explanations and Definitions:
PCT applications are counted in the year/month in which they are received at the International Bureau. The last 1 month's data provisional and earlier months may change as applications are processed at the International Bureau.

WIPO Statistics
International Bureau
PCT Applications Published
December 2007

Explanations and Definitions:

Publications and republications are counted on the date on which the publication or republication occurs. This may cause distortions in the trends when backlogs at the International Bureau are cleared.

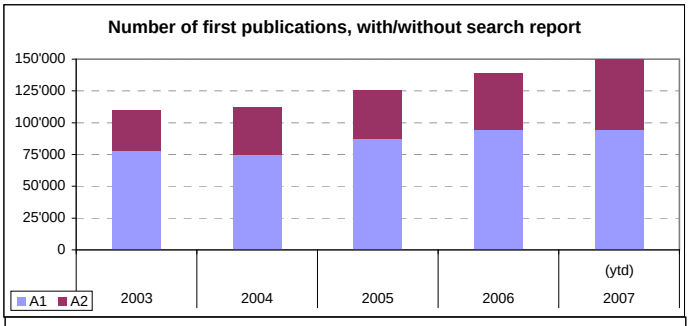

Publications and Republications:

The number of publications by kind code shows the total number of PCT applications published, broken down by those that are published with and without the search report. Publication without the search report is usually a consequence of late establishment of search report by the International Searching Authority. The number of republications shows a strong increase from 2002. This is due to an increase in the number of late search reports, but also due to clearing of a backlog at the IB.

Chapter II Demand Trends

Explanations and Definitions:

The first graph shows the number of Chapter II demands filed in each month. The last four months are estimated because of processing time at the International Preliminary Examining Authority. This first graph shows absolute numbers of Chapter II demands. The second graph shows the trend as the percentage of international applications for which a Chapter II demand was filed by the PCT time limit. This second graph is an indicator of the percentage of applications using Chapter II.

Decline in Chapter II Usage:

The graphs show a strong decline in usage of Chapter II since the change of the Chapter I time limit in April 2002 and since the entry into force of new PCT Regulations in January 2004. The percentage of applications for which a Chapter II demand is filed has fallen from 80% to less than 20%.
